INSPIRING THE NEXT GENERATION – SECOND SITE VISIT WITH LEVEL 1 BRICKLAYING STUDENTS

Intium were delighted to welcome a second group of Level 1 Bricklaying students from South Staffordshire College for another educational and informative site visit.

The visit began with a presentation from Andrew Slaney, Managing Director of Intium, who introduced the students to the company and provided an insight into our work and the projects we deliver. The learners also watched a video showcasing one of Intium's completed projects, following its journey from start to finish.

Intium provided the learners with information on the project and works being carried out, followed by a guided tour of the site by Jim Booth our Site Manager, who introduced them to our brickwork subcontractor, ATS Construction Ltd.

During the visit, Steven Norman from ATS Construction Ltd took the time to speak with the learners about bricklaying, the opportunities available within the trade and the potential career pathways they could pursue. Steve also shared some valuable advice, highlighting the importance of hard work, punctuality and perseverance. He encouraged the students to keep pushing forward and actively seek opportunities to gain valuable work experience.

As part of the site tour, Jim explained the build-up of an acoustic wall currently being constructed ahead of the canopy installation and explained the materials used.

Intium would like to thank South Staffordshire College and Steven Norman from ATS Construction Ltd for taking the time to share his knowledge and experience with the students.
